

## PDECKNC-RC Decking Clips

Quik Drive® Screw Driving Systems

### Decking Applications

Achieve perfectly spaced deck boards and screws without measuring or guessing. The PDECKNC-RC acts as a guide to ensure proper placement of screws when attaching deck boards to 45 mm joists. Each PDECKNC-RC includes a 3 mm and 5 mm deck spacer, and hex key.

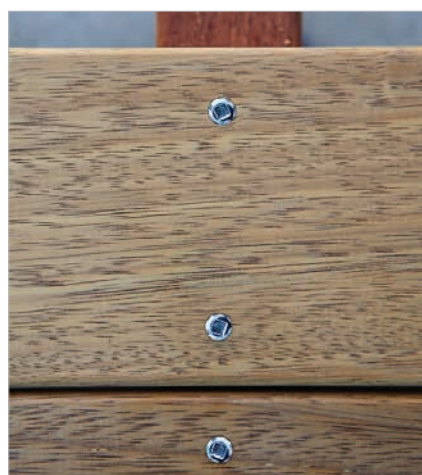

### Features

- Compatible with PRO250, and PRO300 Systems
- Provides consistent screw placement and quality finish
- Sets either 5 mm or 3 mm spacing between the boards
- A perfect deck without the need to bend your back

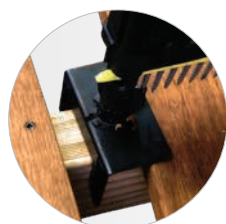

**PDECKNC-RC Decking Clips**

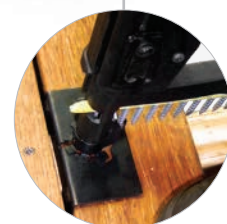

Easily connected to the PRO300 and PRO250 auto-feed attachment.

Consistent screw placement and quality finish, 20 mm in from the edge of the decking board.

The Quik Drive Decking Clip straddles a 45 mm wide joist to give consistent screw placement without marking.

No need to bend at all The Quik Drive Decking Clips create either a 5 mm or 3 mm spacing between the decking board.
